

Undergraduate Lab Report of Jinan University

Course Title Computer Networks Lab Evaluation

Lab Name _____

Lab Address N117 Instructor Dr. CUI Lin (崔林)

Student Name _____ Student No. _____

College International School

Department _____ Major _____ CST _____

Date / /

1. Introduction

1) Objective

[Explain the objective of this lab work]

2) Experiment Principle

[Explain the basic principle or technologies used in this lab work]

NOTE: Please DO NOT directly copy from each lab manual! Use your own words to give a brief explanation.

2. Lab Environment

- Please list **ALL** related configurations of **ALL** computers/devices in your experiment, e.g., Computer Name, IP and MAC addresses of your computer, IP and MAC address of your router.

3. Experiment Steps and Results

- List all your experiment steps and corresponding results. You are also required to **answer all questions** raised in the experiment steps in lab manual.
- You may need to **capture some related screen snapshot** during the experiment. You can bring your USB to the lab.

Tips: (1) For each captured screen snapshot, making necessary **markers and annotations** would earn you additional bonus. (2) Provide sufficient description for each figure.

4. Others

- Answer all additional questions, which are listed in the end each lab manual.
- ANY other things that you want to add: what you learned from this lab, your thoughts, any program codes, etc.
